## **DETAILED ACTION**

### ***Status of Claims***

Claims 9 and 10 are amended in view of the amendment filed on May 26, 2005.

Claims 16-29 are added. Claims 9, 10, and 16-29 are currently under examination.

### ***Response to Amendment***

Applicant's arguments with respect to claims 9-10 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 9, 10, and 16-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Uzoh *et al.* (US Patent No. 5,807,165).

Regarding claim 9, Uzoh teaches an apparatus comprising:

- a polishing pad (64) mounted on a platen (62);
- a slurry disposed on said polishing pad (74);
- a wafer (W) disposed on said polishing pad and said slurry, said wafer mounted in a wafer carrier (66);
- a power supply which applies a voltage between the polishing pad and the wafer (80, see column 5 lines 10-13; note that applying a current inherently implies applying a potential)
- a computer to vary the voltage (column 5, lines 23-33).

Art Unit: 1742

Regarding claim 10, Uzoh teaches that the wafer comprises a continuous and conductive surface layer (**18**, see column 1, lines 38-41).

Regarding claims 16-29, Uzoh teaches that the computer is used to control the voltage (column 5, lines 23-33). This computer would be capable of performing all the claimed functions, including optimizing polishing rates, varying voltage as a function of any parameter, and controlling the voltage by feedback, feedforward, differential and integral control. Thus, these claims are not given any patentable weight because they merely describe the manner in which the apparatus is to be used, but they do not add any structure to the apparatus. See MPEP 2114.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
